

Snow Guard Model: 690M

The Model #690 Snow and Ice Guard is a solid aluminum casting which, when properly installed on metal roofs, can help in preventing the sudden and unexpected movement of snow and ice. Model #690 is effective for use on all standing, batten, or flat seam metal roofs. **Advantages:** The Model #690 has been designed to blend in, and enhance the appearance of the roof when installed, evenly spaced, in linear horizontal rows. When used in sufficient quantities, the Model #690 can withstand the forces exerted by the weight of accumulated snow and ice.
